

RONALD McDONALD HOUSE® PROGRAM IMPACT

More than 40 Years of Experience Enabling Family-Centered Care

The Ronald McDonald House program, which is a core program of Ronald McDonald House Charities®, helps families worldwide stay close to their children while receiving hospital care, increasing the caregivers' ability to spend more time with their child, interact with their clinical care team and participate in medical care decisions. It also allows siblings and other family members to be present and engaged.

Why do families stay at a Ronald McDonald House?

Children whose families stay at Ronald McDonald Houses tend to be the sickest, have traveled the furthest distances for care and spend the longest time in the hospital. The Houses allow families to access the best medical care for their child and being nearby helps children heal and cope better together.

At least one RMHC core program provides care for families being served at

89%

OF TOP CHILDREN'S HOSPITALS WORLDWIDE

RMHC is the world's leading NGO supporting the accommodation needs of families with children receiving treatment at a hospital.

more than 40%

of families served at Ronald McDonald Houses have children in the neonatal intensive care unit (NICU).

94% of hospital administrators agree that Ronald McDonald Houses reduce parental stress and 93% agree they reduce costs for families.¹

more than 345

Ronald McDonald Houses worldwide help families stay close to their sick children when they need to heal.

= 10 Houses

\$700 million saved

Families saved an estimated \$700 million in out-of-pocket lodging and meal expenses due to the presence of Ronald McDonald House® and Ronald McDonald Family Room® programs.

Ronald McDonald House Benefits and Impact

Positive Overall Hospital Experience

In a study of more than 5,400 families with children in inpatient pediatric care and infants in NICU, those who stayed at a Ronald McDonald House reported a more positive overall hospital experience than families who didn't.²

Better Perceived Quality of Life

In a survey of 250 families, researchers found that children and their parents, who stayed at a Ronald McDonald House, had a better perceived quality of life than expected for children with chronic diseases.³

Proximity to Hospitals

The Ronald McDonald Houses' proximity to hospitals provides important benefits for children and their caregivers, such as improved psychological well-being and better perceptions of their child's recovery.⁴

Strengthen Coping Abilities

27% of parents experienced post-traumatic stress symptoms several months after their child's discharge⁵ from a hospital stay, but Ronald McDonald Houses help their guests strengthen coping abilities by keeping families together.⁶

Higher Quality Sleep

Parents whose children have longer hospital stays benefit from higher quality sleep at a Ronald McDonald House compared to parents who slept at their child's hospital bedside.⁷

Provide Spaces to Play

Ronald McDonald Houses provide spaces to play. Playing with other children experiencing similar situations can help these children cope with trauma.⁸

Provide a Lodging Alternative

Ronald McDonald Houses can provide an alternative for patients who need to remain close to the hospital for extended periods but do not require active daily medical care.⁹
